

# JetWrap® High-Speed Coin Wrappers

Up to 25 wraps per minute plus single button set-up

Unsurpassed in speed and durability, the JetWrap coin wrapper is ideal for high volume applications needing maximum output and reliability. Its simple set-up and ease-of-use allow users to finish coin wrapping faster and move on to other tasks.

By pressing a single button, the JetWrap is ready to use. Just add paper and coins. Operation could not be easier or faster.

# JetWrap® features & specifications

**Speed:** Up to 25 wraps/minute

**Coins handled:** All Canadian and U.S. coin denominations.

*Optional Capability*

Special programming is available for tokens or other coin sets with wrappable coin thickness of 1 mm to 3.4 mm.

**One button denomination changes:** Single button coin denomination selection is integrated into the modern ergonomic control panel.

**Stacking height:** JetWrap uses a unique, precise coin stacker design to insure that all coins are neatly stacked at high speed. Stacker height is 30 mm to 110 mm.

**Electronic display:** Large easy-to-see LCD shows clear information about the operation, statistics and allows easy adjustment of the machine. Includes error messages that pinpoint areas needing attention.

**Extra large coin hopper capacity:** 12,000 Dimes with anti-coin bridging design.

*Optional*

Hopper Extension to 50,000 dimes capacity.

**Automated paper handling:** Automatic paper loading and unloading plus anti-curl system. External 2-position paper tray. Auto-feed makes paper changes quick and easy.

Automatic anti-curl relaxes the paper when the wrapper is idle for a few minutes. Press the start button and the paper is automatically repositioned and wrapping starts.

**Bad coin outsort:** Smaller coin reject. Larger and bent coin reject for coins 7 mm to 10 mm greater in size than coin being wrapped. Operator can turn large coin reset feature on or off as needed. Outsourced coins are contained in an outsort drawer.

**Coin spill control:** An electronically controlled gate prevents unrolled coins from exiting into the rolled coin box or conveyor. A special storage drawer accepts remnant coins at the end of a wrapping session.

**Coin roll stabilizer:** JetWrap provides a coin roll stabilizer that can be adjusted for the coin denomination being rolled when used in combination with a roll conveyor.

**Communications port:** RS232 Communications Port provided standard on Cummins JetWrap. 38,400 bps baud rate, asynchronous communication.

**Low noise level:** Special sound attenuating material inside the outer shell minimizes operating noise.

**Dimensions:** 45 in (H) x 23 in (D) x 18 in (W) 1135 mm (H) x 585 mm (D) x 450 mm (W)

**Weight:** 310 lbs - 140 kg

**Power requirements:** 110 Volts +/- 10%, 60 Hz The customer must provide an electrical supply properly grounded and protected by a circuit breaker in accordance with applicable electrical code. This equipment must be plugged into a properly grounded outlet. Power disruptions that result in input voltage other than the power requirements listed can lead to improper operation of this device or result in failure or damage to electrical components. Power disruptions are not covered under machine warranty or preventative maintenance agreement. Power conditioning/stabilizing devices are available through Cummins Allison.

**Power consumption:** 5.0 Amps (full load at nominal voltage)

**Ambient temperature:** 0-40°C

**Ambient humidity:** 30 to 75%

**Available options:**

*Warning Light*

Activated in case of process interruption and can be clearly noticed even in a large area. This is especially important if an operator has to handle several machines.

*Coin Hopper Extension*

Increase coin hopper capacity from 12,000 to 50,000 dimes.
